

THIS ISN'T JUST A JOB.....IT'S A CAUSE!

We recently sent an email to 7000 women as a call to action! Our right to our best health naturally is at stake. And this is why you come to US at the Happy Hormone Cottage and our Piqua Compounding Lab to fill your prescriptions for your natural hormone therapy on your journey to your best health. We aren't just an educational facility with a compounding lab that fills prescriptions. You can find any number of compounding labs to do just that. We go WAY above and beyond that. You see, for us, this isn't just a business. This is our passion and our life's work.

Everything we have ever trained for or hoped to become, we have invested into what we are now doing in helping women. Jeff R.Ph., has gone back to school to get his advanced Fellowship in Functional Medicine because he could find very few healthcare practitioners to help our women with their holistic health. So he went back to school. Someone had to step up. When I finished teaching 6th grade as a public educator in 2007, I just wanted to help women. I had gone through a personal health crisis and Jeff saved me in this arena of women's health and hormone balance. So my intention was to just talk to women about my truth so they heard another option. I knew most wouldn't hear these more natural options at their doctor's offices. I never intended to become a women's health advocate. But obviously, someone has to do it! We are involved with our international organization, IACP (International Academy of Compounding Pharmacists), based in Washington D.C. where we have marched on Capitol Hill to meet with our U.S. Senators and Congressmen to protect the rights of women in this arena of women's health. We are currently involved in building awareness around senate bill S.959, which gives the FDA the authority to restrict and eliminate bioidentical hormone replacement therapy. We are in close contact with our Congressmen to oppose these bills so we can protect women's rights to natural hormone therapy customized for them. Most days I feel like the David of David vs Goliath and it's exhausting. But so much is at stake for women!

We are also THE compounding lab that invested thousands of dollars in a piece of equipment (the Resodyne Acoustic mixer) that provides the highest quality of compounds possible. In fact, we are the first compounding pharmacy in the world to do this. Why? Because we care and we walk our walk every single day to show our passion that women and women's health are important. This is why we are also the only compounding pharmacy listed in Suzanne Somer's books as THE compounding pharmacy of choice in Ohio.

I want to personally thank all women who walk with us, believe in what we do and continue to support us every day. Without you walking with us, none of this would be possible.
